

Collaboration within a shared digital paradigm: opportunities and outcomes

Chiara De Bastiani - chiara.debastiani@unive.it
Giulia Fabbris - giulia.fabbris@unive.it

The aim of this poster is to present the partial results of a collaboration between two PON projects whose common goal is the valorization of Italian Cultural Heritage resources by inserting them in a digital paradigm. The cooperation consists in the connection of a SPARQL Endpoint with a visualization and annotation app in order to further enrich the data and ensure their dissemination and reuse.
