Professor Giorgio Fabbri  
Univ. Grenoble Alpes

MS #4328, "On competition for spatially distributed resources on networks"

2023-5-15

Dear Giorgio, Silvia, and Giuseppe,

Thank you for resubmitting your paper to *Theoretical Economics*. I apologize for the delay; my six month old daughter is keeping me busy.

Fortunately, I have good news. I read the new version and appreciate all the work you have put into the revision. The paper offers a novel model, elegant analysis, a clean result, and interesting policy implications. I am therefore happy to officially **accept** your paper. Thank you for considering *Theoretical Economics* as an outlet for your work.

Referee D has some clarifying questions. Please address these before submitting the final version. There is no need to send in a response letter.

My only comment is that the abstract is too long: We have a 150 word cap at *TE*.

I look forward to seeing the paper in print.

Sincerely,

A handwritten signature in blue ink that reads "Simon Board".

Simon Board
