Preface

This volume contains the revised version of papers presented at VMCAI 2002, the Third International Workshop on Verification, Model Checking, and Abstract Interpretation, Venice (Italy), January 21-22, 2002.

The main goal of the workshop was to give an overview of the main directions decisive for the growth and cross-fertilization of major research activities in program analysis and verification.

The VMCAI series was started in 1997 with the aim of gathering researchers interested in investigating similarities and differences among these three research methodologies, that may be summarized as follows:

- program verification aims at proving that programs meet their specifications, i.e., that the actual program behavior corresponds to the desired one.
- model checking is a specific approach to the verification of temporal properties of reactive and concurrent systems, which has been very successful in the area of finite-state programs.
- abstract interpretation is a method for designing and comparing semantics of program, expressing various types of program properties; in particular, it has been successfully used to infer run-time program properties that can be valuable in optimizing programs.

The program committee selected 22 papers out of 41 submissions on the basis of at least 3 reviews. The principal selection criteria were relevance, quality, and clarity. The resulting volume offers the reader an interesting perspective of the current research trends in the area. In particular, the papers contribute to the following topics: Security and Protocols, Timed Systems and Games, Static Analysis, Optimizations, Types and Verification, and Temporal Logics and Systems.

The quality of the papers, the interesting discussions at the workshop, and the friendly atmosphere enjoyed by all participants in Venice, encouraged us in the project of making VMCAI an annual privileged forum for researchers in the area.

Special thanks are due to the institutions that sponsored the event: the Computer Science Department of the University Ca' Foscari, the European Association for Programming Languages and Systems (EAPLS), the MIUR Project "Interpretazione Astratta, Type Systems e Analisi Control-Flow" and the MIUR Project "Metodi Formali per la Sicurezza - MEFISTO". We are especially grateful to C. Braghin for her helpful support in organizing the workshop.

March 2002

Program Committee

Annalisa Bossi	Univ. Ca' Foscari
Dennis Dams	Bell Labs and TU Eindhoven
Javier Esparza	TU Munchen
Chris Hankin	Imperial College
Joxan Jaffar	NU Singapore
Thomas Jensen	Irisa Rennes
Cosimo Laneve	Univ. di Bologna
Baudouin Le Charlier	UC Louvain La Neuve
Michael Leuschel	Univ. of Southampton
Giorgio Levi	Univ. di Pisa
Torben Mogensen	DIKU, Copenhagen
Supratik Mukhopadhyay	Univ. of Pennsylvania
Thomas Reps	Univ. of Wisconsin
Hanne Riis Nielson	TU of Denmark
David Schmidt	Kansas State University
Pascal Van Hentenryck	Brown University

Additional Referees

Busi Nadia	Levi Francesca	Scozzari Francesca
Charatonik Witold	Levin Vladimir	Sharygina Natasha
Thao Dang	Lovengreen Hans Henrik	Sokolsky Oleg
Di Pierro Alessandra	Maggiolo Schettini Andrea	Spoto Fausto
Elphick Daniel	Maier Patrick	Steffen Martin
Faella Marco	Martinelli Fabio	Sun Hongyan
Ferrari Gianluigi	Murano Aniello	Taguchi Kenji
Giacobazzi Roberto	Namjoshi Kedar	Thiagarajan P.S.
Godefroid Patrice	Ngan Chin Wei	Tronci Enrico
Gori Roberta	Pinna Michele	Varea Mauricio
Hansen Michael R.	Ravi Kavita	Voicu Razvan
Hansen Rene Rydhof	Roychoudhury Abhik	Xiaoqun Du
Khoo Siau-Cheng	Sacerdoti Coen Claudio	Zavattaro Gianluigi
La Torre Salvatore		

Table of Contents

Security and Protocols

Combining Abstract Interpretation and Model Checking for Analysing Security Properties of Java Bytecode	1
<i>Cinzia Bernardeschi, Nicoletta De Francesco</i>	
Proofs Methods for Bisimulation Based Information Flow Security	16
<i>Riccardo Focardi, Carla Piazza, Sabina Rossi</i>	
A Formal Correspondence between Offensive and Defensive JavaCard Virtual Machines	32
<i>Gilles Barthe, Guillaume Dufay, Line Jakubiec, Simão Melo de Sousa</i>	
Analyzing Cryptographic Protocols in a Reactive Framework	46
<i>R.K. Shyamasundar</i>	

Timed Systems and Games

An Abstract Schema for Equivalence-Checking Games	65
<i>Li Tan</i>	
Synchronous Closing of Timed SDL Systems for Model Checking	79
<i>Natalia Sidorova, Martin Steffen</i>	
Automata-Theoretic Decision of Timed Games	94
<i>Marco Faella, Salvatore La Torre, Aniello Murano</i>	

Static Analysis

Compositional Termination Analysis of Symbolic Forward Analysis	109
<i>Witold Charatonik, Supratik Mukhopadhyay, Andreas Podelski</i>	
Combining Norms to Prove Termination	126
<i>Samir Genaim, Michael Codish, John Gallagher, Vitaly Lagoon</i>	
Static Monotonicity Analysis for λ -definable Functions over Lattices	139
<i>Andrzej S. Murawski, Kwangkeun Yi</i>	
A Refinement of the Escape Property	154
<i>Patricia M. Hill, Fausto Spoto</i>	

Optimizations

Storage Size Reduction by In-place Mapping of Arrays	167
<i>Remko Tronçon, Maurice Bruynooghe, Gerda Janssens, Francky Catthoor</i>	
Verifying BDD Algorithms through Monadic Interpretation	182
<i>Sava Krstić, John Matthews</i>	
Improving the Encoding of LTL Model Checking into SAT	196
<i>Alessandro Cimatti, Marco Pistore, Marco Roveri, Roberto Sebastiani</i>	

Types and Verification

Automatic Verification of Probabilistic Free Choice	208
<i>Lenore Zuck, Amir Pnueli, Yonit Kesten</i>	
An Experiment in Type Inference and Verification by Abstract Interpretation	225
<i>Roberta Gori, Giorgio Levi</i>	
Weak Muller Acceptance Conditions for Tree Automata	240
<i>Salvatore La Torre, Aniello Murano, Margherita Napoli</i>	
A Fully Abstract Model for Higher-Order Mobile Ambients	255
<i>Mario Coppo, Mariangiola Dezani-Ciancaglini</i>	

Temporal Logics and Systems

A Simulation Preorder for Abstraction of Reactive Systems	272
<i>Ferucio Laurențiu Tiplea, Aurora Tiplea</i>	
Approximating ATL* in ATL	289
<i>Aidan Harding, Mark Ryan, Pierre-Yves Schobbens</i>	
Model Checking Modal Transition Systems Using Kripke Structures	302
<i>Michael Huth</i>	
Parameterized Verification of a Cache Coherence Protocol: Safety and Liveness	317
<i>Kai Baukus, Yassine Lakhnech, Karsten Stahl</i>	

Author Index	331
