## MATHEMATICAL METHODS IN ECONOMICS AND FINANCE

Dipartimento di Matematica Applicata  
Università Ca' Foscari Venezia  
Dorsoduro 3825/E, 30123 Venezia, Italia

Journal webpage URL: <http://www.dma.unive.it/mmef/>

---

*Mathematical Methods in Economics and Finance* publishes original papers that contribute to the theory, methodology and applications in the areas of mathematical economics, financial mathematics, mathematical finance, actuarial mathematics, management science and operational research.

Papers may be submitted to any member of the Editorial Board via ordinary mail to the address: Dipartimento di Matematica Applicata, Università Ca' Foscari di Venezia, Dorsoduro 3825/E, 30123 Venezia, Italia, or via electronic mail to the address: [mmef@unive.it](mailto:mmef@unive.it).

Papers must be written in English according to the journal formatting guidelines (please download and use the template file *mmef-Template.zip* from the journal website).

All submitted papers will be double-blindly peer reviewed by at least two anonymous referees.

Free download of published papers is available from the journal website.

## Contents

<b>Global asset return in pension funds: a dynamical risk analysis . . . .</b>	<b>1</b>
<i>Sergio Bianchi and Alessandro Trudda</i>	
<b>A tale of two systems: Winners and Losers when moving from defined benefit to defined contribution pensions . . . . .</b>	<b>17</b>
<i>Evert Carlsson, Karl Erlandzon and Jonas Gustavsson</i>	
<b>A stochastic model for the analysis of demographic risk in pay-as-you-go pension funds . . . . .</b>	<b>41</b>
<i>Alessandro Fiori Maccioni</i>	
<b>A policyholder's utility indifference valuation model for the guaranteed annuity option . . . . .</b>	<b>61</b>
<i>Matheus R. Grasselli and Sebastiano Silla</i>	
<b>Mergers, acquisitions, and innovation . . . . .</b>	<b>81</b>
<i>Hidenobu Hirata</i>	
<b>Risk indicators in equity markets . . . . .</b>	<b>101</b>
<i>Leonard MacLean, Giorgio Consigli, Yonggan Zhao and William Ziemba</i>	
<b>High watermarks of market risks . . . . .</b>	<b>119</b>
<i>Bertrand Maillet, Jean-Philippe Médecin and Thierry Michel</i>	

## Preface

This is the second of two special issues of *Mathematical Methods in Economics and Finance* devoted to the *International Conference MAF 2008 – Mathematical and Statistical Methods for Actuarial Sciences and Finance* held in Venice (Italy) from March 26 to 28, 2008.

The conference has been the first international edition of a biennial national series begun at 2004, which was born by a brilliant belief of the colleagues – and friends – of the Department of Economics and Statistical Sciences of the University of Salerno: the idea following which the cooperation between mathematicians and statisticians in working in actuarial sciences, in insurance and in finance can improve research on these topics. The proof of the goodness of this belief has consisted in the wide participation to these events.

This issue collects a series of original papers freely submitted to the journal by Contributors of the conference and, following the usual praxis, each peer reviewed by at least two anonymous referees.

Guest Editors (and co-Chairs of the conference):

Marco Corazza and Claudio Pizzi
